

Preservatives in Infused Dried Fruits

(This statement does not expire and will only be updated if changes are required)

To All Graceland Fruit Customers,

Graceland Fruit, Inc. does not add preservatives to any of its dried fruit products.

Fruits from the berry family which includes: Cherries, Cranberries, Cultivated Blueberries and Wild Blueberries have been found to contain small amounts of naturally occurring Benzoates and Sorbic Acid. Therefore, tests showing the presence of these substances are a result of the naturally occurring compounds and not from any additives used during the fruit infusion and drying process.

All of our products are produced from ingredients listed on our labels and specifications which are typically stated as; "(Fruit), Sugar, Sunflower Oil".

Respectfully,

Christopher J. Oberski
