Talk to Our Experts

Graceland Fruit, Inc. is a leading producer and global distributor of premium quality dried fruit ingredients for the food industry. Our exceptional product and service performance make it easy for innovative food manufacturers and providers to create delicious, on-trend products that surprise and delight their consumers.

Graceland Fruit infused dried cranberries start with high-quality fresh fruit harvested at peak season and flash frozen to preserve its integrity, nutrition, vibrant color, and authentic flavor.

One of the most nutrient-dense fruit ingredients available, the bold color and distinctive piece identity of this sweet-tart superfruit delivers the all-natural health cues sought by today's consumer. The intense flavor and moist chewy texture deliver delicious taste in every bite.

Nutrients in dried fruit are more concentrated than fresh fruit, allowing a smaller amount of dried to provide similar benefits to a larger quantity of fresh. The nutrient value of ½ cup dried cranberries is equivalent to 1 cup fresh cranberries. They contain antioxidants that protect the body from harmful free radicals and are:

- A good source of fiber
- Naturally fat free
- Cholesterol free
- Sodium free

Cranberries also have an array of naturally occurring flavonoids and phytonutrients including anthocyanins, a polyphenol that gives cranberries their bold red color and contain powerful antioxidants, and Proanthocyanidins (PACS), bioactive compounds unique to cranberries that provide antioxidant and anti-inflammatory benefits.

More than 500 original research and review articles on the health benefits of cranberries have been published in peer-reviewed medical and nutrition journals\*. While research is on-going, initial findings suggest cranberries may:

- Reduce inflammation associated with chronic disease and aging
- Improve heart health
- Support digestive health
- Improve insulin sensitivity and glucose response among type 2 diabetics
- Promote urinary tract health
- Support oral health
- Slow tumor progression in prostate, liver, breast, ovarian, and colon cancer

As the centerpiece or as an accent, our infused dried cranberries contribute to the nutritional profile of a wide variety of commercial food applications. Buzz-worthy for their health benefits and crave-worthy for their intense flavor and moist, chewy texture, our infused dried cranberries deliver delight.
